## PARTNER Pricing – CPRM Options

### CPRM Projected Summer 2021

- Some users prefer to use PARTNER as a CPRM [Community Partner Relationship Management System]. This option differs from Grab & Go in that the CPRM allows you to manage your project as an “ecosystem” with a focus on members (and not one network at a time) that you can survey at multiple points in time. The CPRM features an advanced, **customizable Member Profile** that allows you to navigate through your data via member look-ups, and allows you to create member profiles that include more information that can be shared with the network members themselves. Using the CPRM allows you to use advanced features. The table below outlines CPRM license costs.
- Most CPRM users prefer the VNL team work with them to set up the system, define the measures to meet their needs, and do a run through of the system to learn how to administer it and interpret results. The cost to have the VNL team work with your organization/system to implement the CPRM is **\$20,000** and scoped to complete over 8 weeks. Inquire for details on timeline, milestones, and workplan.
